TO OUR PATRONS.

UPON handing you our Catalogue for the coming season, we are forcibly reminded that we have now completed a round "FORTY YEARS" of business experience,

— 1858 — — 1898 —

and during this time we have made *hosts of friends*. We wish first of all, to extend a most hearty greeting to the scores of old, and the hundreds of new customers, who have stood by us, and second, we would solicit a further continuation of their liberal patronage.

In the Catalogue will be found the names of well-known standard varieties of seeds, proven by experience to be the most valuable of their kinds for this climate, and we would request that you give all our specialties a space in your gardens. We will assure you that no **new varieties or novelties** will be offered you, except those in which we have the fullest confidence, and which will repay your attention. We have always paid special attention to the **purity** of our seeds, and complaints made that seeds are not good, may more often be attributed to other causes, than to the quality of the stock, and to insure the purchaser further protection against loss incurred from planting inferior strains, we will add that "**all our seeds have been tested,**" and the merit of the stock is beyond question.

Market Gardeners, requiring large quantities of Seeds, **are invited to write for Special Prices.**

We forward seeds by **Mail** or **Express** as the purchaser may wish.

All sums to the amount of one dollar and upwards may be sent at our risk if forwarded according to the following directions, viz: by Post Office Money Orders, Bank Drafts or Cash sent in a registered letter.

In sending an order please give your **Name, Post Office, County and State** in full, as plain as possible; your **name especially written very distinctly**. We receive many letters without the signature of the writer, which causes much trouble to us and anxiety to them. Please be particular in this respect.

Greenhouse Plants of every description can be furnished at short notice.

In shipping we make no charge for delivery to railroads or express companies.

Bags charged at cost.

Very respectfully yours,

KENDALL & WHITNEY.

A FEW BRIEF HINTS

. . . ON THE . . .

SOWING AND CULTIVATION OF

FLOWER SEEDS.

THE SOIL AND ITS PREPARATION.

THE BEST soil for annuals and for most flowering plants, whether biennials or perennials is a light rich loam. In such they grow readily, and attain to great perfection of bloom with but little care. By the application of proper manures, sand or clay, they can be brought to such a condition as to answer all the purposes of a flower garden. Deep and thorough trenching in the autumn, if possible, and the application of very old decayed manure or leaf mould, will give the amateur a well prepared and suitable soil.

Where the soil is too light, a thin layer of clay, if to be had, should be spread over the surface in the autumn, and dug in,—after being pulverized by the winter frosts—in the spring. This, with the use of old manure—that which has lain a year or more, and been frequently turned over till it becomes thoroughly decayed—will keep the garden in good condition. No unvarying rules can be given; much must be left to the judgment of the amateur. He must understand that the soil of a good garden should be deep, well pulverized, friable and rich.

Where the flower garden is a specialty, then more pains ought to be taken, and those who are about to do this, if they have not the requisite information, will consult something more than a catalogue. Our hints are intended for the mass of the people who love flowers, and do not wish to incur great expense in the gratification of their taste.

PERIOD FOR SOWING.

This must depend much upon the season as well as the locality. As a general rule, the proper time to commence sowing is about the middle of April; though a few sorts may be planted as soon as the ground can be got ready; and for a succession the sowing should be continued until June. In the Southern States of course, January, February, or March will be the time to sow, as they correspond with April, May and June at the North. To avoid all danger of injury, the sowing may be deferred till the last of April, but when a little labor is of no consideration the sowing may be made earlier, and in case of failure or injury from frost or wet, another sowing may be made when the weather is more favorable. Because we recommend April, it is not to be understood the sowing must be made at that time. If sown in any part of May, they will flower later, but abundantly throughout the latter part of the summer.

It is the great error to cover too deeply; and the cause of more than half of the complaints against seedsmen of selling old and worthless seeds come from inexperience and want of judgment in sowing. No rule can be given in this respect; but as a general guide, all large seeds, such as Sweet Peas, Lupins, etc., may be sown half an inch deep—smaller, less, and for the smallest, Clarkia, Pinks, etc., a covering of one-sixteenth of an inch will suffice. If sown too deep they are longer in germinating, and are liable to decay. Avoid the general error of sowing the seeds too thickly, as it causes an elongated and feeble growth, which no subsequent thinning will entirely remedy.

As soon as the seedlings have made three or four leaves, and are an inch high they should be thinned out. If they are kinds which will bear removal, they may be replanted in vacant spaces in the border. Tall growing plants with spreading branches will require more room than slender growing dwarf kinds. Stir the soil around the plants from time to time; and, if they appear crowded, a second thinning will be of great benefit to those that remain. If the growth is not strong from the nature of the soil, apply occasionally a very small amount of guano or bone dust.

Transplanting should if possible always be done in cloudy weather, and toward evening. If the soil is dry the plants will require a light watering, to settle the earth around the roots, and if warm, sunny days succeed the operation, they will root all the better to have shade for a day or two. All large growing plants should be transplanted singly; but many of the smaller may be removed in patches without any trouble. After the plants are established, they will need no other care than to tie up the taller growing sorts to stakes, to prevent the wind and rain from beating them down, and injuring their blossoms.

GARDEN REQUISITES.

There are several aids to the economical management of the garden, which are almost indispensable, one of these is the *hot-bed* frame for the forwarding of plants for early planting. A frame made of various sizes, according to the size of the garden, from four sashes upward. The length of sash is generally seven feet by three and a half wide, the size of glass six by eight inches, making the entire frame of sashes fourteen by seven feet. The frame should have a southern or a southeastern exposure; should be made up of fresh horse manure, and a few leaves mixed with it; this must be laid in a heap preparatory to being used, and when in proper state of fermentation, prepared for the reception of the frame. A few inches of rich, loamy soil must be spread over the manure; then cover the frame with the sashes, and after standing a few days to allow the rank heat and steam to pass off, the seed can be sown. Where the ground is well drained, a better plan is to dig out a space the size of the frame, one or two feet deep, according to the season and the heat required; in which the manure is placed, care being taken to pack firmly and evenly.

SEEDS FOR ASSOCIATIONS OR CLUBS.

The following seeds may be selected from our Catalogue, at the prices named, and will be forwarded, postage free, to any part of the United States:

Purchasers remitting \$1.00 may select <i>seeds in packets</i> at Catalogue prices, amounting to \$1.25

PASSION FLOWER.

A splendid class of climbers with curious flowers produced in great profusion; fine for conservatory, or will answer for the garden; flowering freely during the autumn. FINE MIXED.....

10

SWEET PEAS.

Exceedingly useful, well known, free flowering highly ornamental plants, flourishing in any open situation. The seed should be sown as early as the ground can be worked in the spring, to enable the vines to get a good strong growth before the warm weather comes. Prepare the ground by thoroughly working in a large quantity of well-rotted manure. Make a trench six inches deep; in this sow the seed and cover two inches deep. As soon as the plants begin to show through, fill in the trench. This will secure a deep planting without the bad effect deep covering of the seed at first, and so enable the plant to bloom continually through the heat of the summer.

Half pounds furnished at **Pound Rates**.

Half bushels furnished at **Bushel Rates**.

ASPARAGUS.

Sow early in May, thinly, in rows, one inch deep and two feet apart. The next season plant in drills, two inches deep and two feet apart, spreading the roots well out, in ground thoroughly manured and trenched, at least two feet deep.

	Per Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
Conover's Colossal. The best variety.....	.05	.10	.15	.40
Conover's Colossal Roots, 2 years old per 100..	\$1.25.			

In consequence of the great bulk of Asparagus Roots we cannot send them by mail.

ENGLISH BEANS.

Plant as early in the spring as the ground can be worked, from two to four inches apart, in drills from twenty-four to thirty inches apart. As soon as the plants are in full blossom, and the lower pods begin to set, pinch off the tops; this will insure the filling of the pods and hasten the maturity of the seed.

Beans ordered by mail are subject to an extra charge of 15 cents per quart for postage. Pints furnished at quart rates.

	Per Pkt.	Qt.	Pk.
Broad Windsor. The best sort, very hardy.....	.10	.30	\$1.25

BEANS—Dwarf or Bush.

A succession of sowings can be made from the first week in May until August. Plant in drills about two inches deep, and from eighteen inches to two feet apart, according to the richness of the soil; the poorer the soil the closer they can be planted; the plants should be about three inches apart.

One quart is sufficient for one hundred feet of drill; $1\frac{1}{2}$ bushels for one acre in drills.

	Per Qt.	Pk.	Bu.
Burpee's Bush Lima. The only bush form of the true large lima bean; the bushes grow eighteen to twenty inches high. It is an immense yielder, of handsome large pods, well filled with very large beans, which are identical in size and luscious flavor to the well-known large pole lima.....	.25	1.50	\$5.00
Low's Champion. Early, hardy, thrifty, and enormously productive; it also combines extreme tenderness and delicious flavor, and being absolutely without strings to the pods, it excels every other variety as a snap or string bean. As a shell bean it has but few equals, and is of splendid flavor when cooked dry.	.20	.90	3.25
Early Long Yellow Six Weeks. Hardy and prolific.....	.15	.80	3.00
Early Valentine. Round pods, early, good flavor.....	.15	.80	3.00
Early Mohawk. Very productive and of good quality.....	.15	.80	3.00

Indian Chief. A very tender snap bean; yellow pods.....	.20	1.25	4.50
White Case Knife. Good green podded variety.....	.20	1.25	4.50
Scarlet Runner. Very ornamental, free climber, with bright scarlet flowers.....	.25	1.50	5.00
White Dutch Runner. Same habit as the Scarlet Runner, flowers and beans being white.....	.25	1.25	4.50

BEET.

DEWING'S TURNIP
BLOOD BEET.

The best results are obtained on a deep, rich, sandy loam. For early use, sow as soon as the ground will admit, in drills fourteen inches apart, and thin to four inches; for the main crop, sow the first week in May, and for winter use as late as June. The soil should be deeply manured and well cultivated. In lifting and storing the roots, care must be taken that they are not bruised.

One ounce to fifty feet of drill; six pounds to the acre.

	Per Pkt.	Oz.	¼ lb.	Lb.
Egyptian Blood Turnip. Very early and of rapid growth; color deep crimson. Of excellent quality.....	.05	.10	.20	.50
Eclipse. This variety is about as early as the Egyptian, but larger and of finer quality. Color dark crimson.....	.05	.10	.20	.50
Early Flat Bassano. This variety is chiefly valued for its early maturity.....	.05	.10	.20	.45
Edmand's Early Turnip. A variety of handsome round shape, the skin is <i>deep blood red</i> in color, the flesh very dark, and <i>exceedingly sweet and tender</i> in quality.....	.05	.10	.20	.45

Dirigo Extra Early Beet.

THE EARLIEST VARIETY IN CULTIVATION,
UNEQUALLED IN QUALITY.

It originated with a leading market gardener, and was brought to perfection after years of careful cultivation.

It is a rich, blood-red beet of fine grain and flavor, is earlier than either the Egyptian or Eclipse, of smooth and rapid growth; top and tap roots being very small.

The very best for Early Market.

The following has been received from a prominent firm of SEED GROWERS in London, England:

"We are pleased to say that our trials of this beet have proved it to be one of the very *earliest* and *best* varieties ever raised, and this opinion has been confirmed by trials made by a noted seedsman in New England."

Per Pkt., 5 cts. Per Oz., 10 cts. Per 1-4 lb., 30 cts.

	Per Pkt.	Oz.
Purple Cape. Heads greenish purple, a good variety.....	.05	.30
White Cape. Very white; sure to head; standard sort.....	.05	.30

BRUSSELS SPROUTS.

Produces from the stem small heads resembling cabbage in miniature. The sprouts are used as greens, and become very tender when touched by the frost. Sow in May and manage as winter cabbage.

	Pkt.	Oz.	$\frac{1}{2}$ lb.	Lb.
Improved Dwarf. A variety of excellent quality.....	.05	.15	.50	\$1.50

FOTTLER'S IMPROVED BRUNSWICK CABBAGE.

CABBAGE.

The Cabbage is one of the most important vegetables, and some of its varieties are universally cultivated. The ground must be highly manured, deeply dug or plowed, and thoroughly worked, to insure good, full sized heads. A heavy, moist and fresh loam is the most suitable. The early sorts should be sown very early in the spring, in hot beds, or later in the open ground. Eighteen inches by three feet apart is the common distance.

One ounce will produce about 3,000 plants.

	Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.

Improved American Savoy. Very sweet and tender; good sized, firm heads; very reliable and much esteemed for family use.....	.05	.20	.60	2.00

CARROT.

Carrots require a very finely pulverized soil, to grow them to perfection. A good light, and well enriched sandy loam is the best for this crop. For field culture, sow in drills, three to three and one-half feet apart, so as to cultivate by horse. Market gardeners sow in drills about eighteen inches apart and cultivate by hand. For early crops, cover one-half an inch deep, and thin to six inches apart, in the rows; for late, cover three-fourths of an inch deep, and thin to four inches.

One ounce to one hundred feet of drill; three to four pounds to the acre.

OXHEART CARROT.

CARROT—Continued.

Early French Forcing. The earliest variety; valuable for forcing.....	.05	.10	.25	.75
Early Horn. Early, fine grain; medium size, an excellent table sort.....	.05	.10	.25	.70
Oxheart. Very thick and short, fine grained and sweet.....	.05	.10	.25	.70
Chantenay. A choice variety. Longer than the Scarlet Horn, and a little broader at the top.	.05	.10	.25	.75

Danver's Half Long. In form it is midway between the Long Orange and Short Horn. The root is of a rich dark orange color, and grows very smooth. Very productive and keeps well.....	.05	.10	.20	.65
Improved Long Orange. The best late variety. Roots of large size, heavy cropper and excellent keeper.....	.05	.10	.20	.60
Large White Belgium. Large, long rooted variety; valuable for feeding..	.05	.10	.20	.50

CAULIFLOWER.

Any soil that will grow early Cabbages will grow Cauliflower, as their requirements are almost similar; but as the product is more valuable, extra manuring and preparation of the soil, will be well repaid.

The seeds may be sown in the hot-bed in March or April, and transplanted to open ground about the first of May.

One ounce will produce about 3,000 plants.

	Per Pkt.	Oz.
Extra Early Dwarf Erfurt. The earliest variety; large compact heads, of fine quality.....	.15	\$2.00
Henderson's Early Snowball. One of the early sorts. Very reliable and grown largely for market.....	.20	2.00
Thorburn Gilt-Edge. Large, heavy sort; one of the best and surest of all the sorts now in cultivation.....	.20	2.25
Carter's Dwarf Mammoth. A hardy variety, of dwarf and compact habits, with a firm white head. Stands dry weather.....	.10	1.00

CELERY.

To have Celery early it should be sown in a hot bed, quite early in the spring, and when three inches high, plant out in a well prepared bed, which must be covered in frosty weather. For the principal crop sow early in spring, very shallow in the seed-bed, and when the plants are about six inches high, transplant them six inches apart into trenches for blanching. Dig the trenches four feet apart, a foot wide and ten inches deep. Fill in five or six inches of well rotted manure, and mix thoroughly, half a spade deep, with the earth at the bottom. The tops of the plants should be shortened before they are set. Earth up to blanch, three or four times during their growth, taking care that no earth falls in the centre of the plant.

One ounce of seed produces about 4,000 plants.

GOLDEN SELF-BLANCHING CELERY.

	Per Pkt.	Oz.	½ lb.	Lb.
Boston Market. A favorite variety, remarkable for its tender, crisp and succulent stems, and its peculiarly mild flavor; keeps well.....	.05	.25	.60	\$2.00
Henderson's White Plume. Crisp, solid and possessing a sweet nutty flavor; requires very little labor in blanching. Very early and handsome..	.05	.25	.60	2.00

CELERY—Continued.

	Per Pkt.	Oz.	½ lb.	Lb.
Golden Self-Blanching. A fine solid variety of a beautiful waxy, golden color; very thick stalks of excellent flavor; growth close, compact and of medium height.....	.05	.25	.75	2.50
Giant Pascal. An easily blanched variety, superior for late use.....	.05	.25	.75	2.50
Henderson's Half Dwarf. A fine white variety.....	.05	.25	.75	2.50
Soup Celery. Used for flavoring pickles, soups, etc.....		.05	.15	.40

CHERVIL.

Curled Chervil. An aromatic sweet herb. The young leaves are used in soups and salads. Sow thinly in May, in drills half an inch deep, one foot apart.....	.05	.10	.25	.75
---	-----	-----	-----	-----

CHICORY.

Large Rooted. Used to mix with, or as a substitute for coffee. Cultivation same as the carrot.....	.05	.10	.25	.75
---	-----	-----	-----	-----

CORN—Sweet.

The Sweet or Sugar varieties being liable to rot in cold, wet ground, should not be planted before the middle of May, and for a succession continue planting every two weeks until July, in rich, well manured ground, in hills three feet apart each way, covering about half an inch, and thin out to three plants to a hill, or plant in rows four feet apart, and to stand eight inches apart in the rows.

The field varieties should be planted four feet apart each way, leaving three plants to a hill.

One quart to 200 hills, ten quarts to an acre.

Corn ordered by mail is subject to an extra charge of 10c. per qt. for postage. Pints furnished at quart rates.

Per Pkt. Qt. Pk. Bu.

Cory. Very early, dwarf variety; an excellent sort, sweet, and of rich flavor, desirable for private or market gardens.....

.05 .15 .80 \$3.00

White Cory. Similar to the above but with white cobs.....

.05 .15 .80 3.00

Burbank's Early. As early as the Cory. It has a pure white cob, with a rich, cream white kernel, sweet and juicy.....

.05 .15 .80 3.00

Early Marblehead. This resembles very closely the Cory, but is not so early.....

.05 .15 .80 3.00

Crosby's Extra Early. The best early sort, very sweet and of fine flavor. Ears rather short, averaging from twelve to sixteen rows. An excellent market variety, and largely grown for canning. Our own growing from stock obtained from the originator.....

.05 .20 1.00 3.50

Late Crosby. Similar to the above, nearly ten days later.....

IMPROVED THICK-LEAVED DANDELION.

DANDELION.

The Dandelion resembles Endive, and affords one of the earliest as well as one of the most healthful of spring greens. Sow as early as the weather will permit, in good well enriched soil, in rows twelve inches apart covering seed one-fourth of an inch deep, the earth firmly pressed over the seed. *One ounce to one hundred feet of drill.*

	Per Pkt.	Oz.	¼ lb.	Lb.
Improved Thick-Leaved.				
The best variety05	.30	\$1.00	\$3.50

EGG PLANT.

The Egg Plant will thrive well in any good garden soil. Sow in the hot-bed, and when two or three inches high, prick out into pots or rows, two and one-half to three inches apart. When the weather will permit, transplant into good, rich soil, thirty inches apart each way.

	Per Pkt.	Oz.
New York Improved Purple. The leading market variety; very productive.....	.05	.40
Early Long Purple. Hardy and productive.....	.05	.30
White. Choice, for ornamental use....	.05	.30

ENDIVE.

For early use, sow in May, scattering the seed thinly in drills ten inches apart, covering it lightly, and for succession, every two or three weeks until mid-summer. The plants must be blanched before using, which is accomplished by gathering the large outer leaves to a point at the top, and tying them together.

	Per Pkt.	Oz.
White Curled. For early use.....	.05	.20
Green Curled. Best for late crop.....	.05	.20

KALE OR BORECOLE.

Sow early in May in a prepared bed, covering the seed lightly. Transplant in June, and treat in the same manner as for Cabbages.

	Per Pkt.	Oz.	¼ lb.	Lb.
Green Curled Scotch. A round dwarf variety, rarely exceeding 18 inches in height, but spreading out under good cultivation to three feet in diameter.05	.10	.30	\$1.00

KOHLRABI.

A vegetable intermediate between the Cabbage and Turnip. It is best cultivated by sowing the seeds in rows, in May, June and July, according to latitude.

	Per Pkt.	Oz.	¼ lb.	Lb.
Early White. Flesh white and tender; the best market sort.....	.05	.20	.50	\$1.50
Early Purple. Differing from the above in color, which is of a bluish purple.05	.20	.50	1.50

LEEK.

The Leek is very hardy and easily cultivated; it succeeds best in a light well-enriched soil. Sow as early in spring as practicable, in drills one inch deep, and one foot apart. When six or eight inches high, they may be transplanted in rows ten inches apart each way, as deep as possible, that the neck being covered, may be blanched.

	Per Pkt.	Oz.	¼ lb.	Lb.
London Broad Flag. A large variety with broad leaves.....	.05	.20	.60	\$2.00

VICTORIA CABBAGE LETTUCE.

BOSTON CURLED LETTUCE.

LETTUCE.

Lettuce thrives best in rich, moist ground. Sow the seeds in hot-beds in February or March, and transplant into a sheltered border with a southern exposure. For successive crops, sowing may be made in the open ground as early as spring opens, and continuing until July.

One ounce to 120 feet of drill.

	Per Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
Early Curled Silesia. Fine for summer use.....	.05	.15	.40	\$1.25
Victoria Cabbage. Hardy and fine for early sowing.....	.05	.20	.40	1.25
Early Tennisball. One of the earliest and best heading varieties.....	.05	.20	.60	2.00
Boston Curled. A variety of great beauty and of very superior quality. Leaves beautifully curled; attractive on table.....	.05	.15	.40	1.25
Hanson. Heads very large, solid, tender, crisp and of fine flavor, color beautiful green outside and white within.....	.05	.15	.40	1.25
Salamander. A fine summer lettuce. It is slow to run to seed, and will stand the drought and heat better than other varieties.....	.05	.15	.40	1.25
Deacon. Large and very solid heads, crisp and tender.....	.05	.15	.40	1.25
Brown Dutch. A large, hardy variety.....	.05	.15	.40	1.25

MARTYNIA.

A strong growing, hardy annual, with curious shaped seed pods, which when young and tender, are highly prized for pickling. The pods are produced in great abundance, and should be gathered when about half grown. Plant in May or June, in rows two feet apart, making hills about a foot apart.

	Per Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
Martynia Probosidea. Best for pickles.....	.05	.25	.75	\$2.50

MONTREAL MELON.

MELON—Musk.

Melons thrive best in a moderately enriched, light soil; the hills should be six feet apart each way. After all danger of frost is passed, plant twelve or fifteen seeds in each hill, and when well up, thin out to three or four plants in each hill.

One ounce to sixty hills; two to three pounds for an acre.

	Per Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
Green Citron. Fruit medium size, deeply netted, shape nearly round, from six to eight inches in diameter, flesh green, and of rich delicious flavor....	.05	.10	.20	.60
Nutmeg. Named from its shape; green flesh, sweet.....	.05	.10	.20	.60
Large Round Yellow Cantaloupe. Flesh reddish orange, sweet and of good flavor; an early and productive variety.....	.05	.10	.20	.60
Pineapple. Dark green, oval, netted, flesh thick, sweet and juicy.....	.05	.10	.20	.60
Surprise. Very early, medium size; salmon colored; flesh of superior flavor.	.05	.10	.20	.60
Montreal. Large, round, netted; flesh thick and light green.....	.05	.10	.20	.60
Large Yellow Musk. A very large variety, deeply ribbed, and thickly netted; flesh salmon yellow, thick and sweet. Used in the green state for "Mangoes".....	.05	.10	.20	.60

MELON—Water.

Plant in hills eight feet apart, and cultivate same as Musk Melon. *One ounce for thirty hills; four to five pounds to an acre.*

	Per Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
Mountain Sweet. An old and reliable sort; red flesh.....	.05	.10	.20	.60
Black Spanish. Fruit of large size, almost round, skin dark green; flesh red.05	.10	.20	.60
Phinney's Early. Productive, early and finely flavored; red flesh.05	.10	.20	.60
Scaly Bark. The flesh is light crimson in color, very tender and fine flavor..	.05	.10	.20	.60
Citron. The standard variety for preserves.....	.05	.10	.20	.60

**MUSHROOM.****MUSHROOM SPAWN.**

Mushrooms can be grown in the cellar, shed, or any dark room under a temperature of 50 to 60 degrees. If practicable divide your place in narrow beds three to five feet wide, prepare your ground by thoroughly mixing one part of common garden soil with two parts of fresh horse manure, free from straw or litter. This well mixed compound should be filled in your beds 12 to 15 inches deep and pounded down as much as possible. Fermentation will set in at once and after the temperature of your soil has declined to about 85 or 90 degrees, the bed is ready for spawning.

Attention from the first in the preparation of manure is one of the most essential points, then its condition when made into a bed, respecting the temperature at the time of planting the spawn. Make holes in your bed about ten inches apart, each to hold two or three pieces of spawn about the size of a walnut, then cover the same with two inches of light soil, pressing it solid all over the bed. In order to hold an even moisture in the soil protect your beds with three to four inches of straw, and if the surface should become a little dry, moisten this protecting straw carefully with luke warm water. If the temperature is right mushrooms will begin to come up in about six to eight weeks, and the bed will continue bearing for about a month.

English Spawn. In bricks, per lb., 15 cts.; 8 lbs., \$1.00.

By mail, add 10 cents per pound for postage.

MUSTARD.

A pungent salad used with Cress. The seed is used for flavoring pickles, etc. Sow in May thickly in rows and cut when two or three inches high.

One ounce to forty feet of drill.

	Per Oz.	$\frac{1}{4}$ lb.	Lb.
White London. Best for salad.....	.05	.10	.25
Brown or Black.05	.10	.25

OKRA.

Sow late in the spring, after the ground has become warm, in drills three feet apart, where the plants are to remain. Thin out from nine to twelve inches. They should be well manured. They may also be raised in pots, or in a hot bed, and transplanted.

	Per Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
Improved Dwarf Green. Small, green and round smooth pods... ..	.05	.10	.20	.50

ONION.

No vegetable is more extensively known and cultivated than the Onion. A good crop is impossible unless the soil is very rich and kept clean. Use well-rotted manure freely, and get the crop in as soon as possible in spring, no matter if the weather is cold and unpleasant. Sow in drills one foot apart and cover about one-third of an inch, treading or rolling after sowing, so that the hot, dry atmosphere may not dry up and destroy the sprouting seed.

One ounce to one hundred feet of drill; five pounds to the acre.

	Per Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
Large Red Wethersfield. Large size, productive and a good keeper.....	.05	.15	.30	\$1.00
Extra Early Red. Ten days earlier than the Wethersfield, of medium size and deep rich color; an abundant producer, and of good form and flavor, keeping well.....	.05	.15	.30	1.00

**YELLOW GLOBE DANVERS ONION.**

ONION—Continued.

	Per Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
Yellow Globe Danvers. Extra choice Maine grown seed, raised expressly for market garden trade. This is far superior to western grown seed; being much earlier, it is sure to produce a good crop in any locality. The Yellow Danvers is the most profitable variety to raise. It is very productive, a good keeper, of mild flavor, and always meets a ready sale.....	.05	.20	.60	2.00
Yellow Globe Danvers. Grown from Buxton's stock.....	.05	.15	.35	1.00
White Portugal. A mild and desirable summer variety; extensively grown for pickling.....	.05	.20	.60	2.00
New Queen. A silver skinned variety of quick growth and remarkable keeping qualities.....	.05	.20	.50	1.50

ONION—Sets.

Onion Sets should be planted near the surface as early in the spring as the ground will permit, in drills about twelve inches apart and four inches in the rows. They produce a very early and profitable crop, and grow in any good soil.

Add ten cents per quart if sent by mail.

	Per Qt.	Per Pk.
White Onion Sets20	\$1.00
Yellow Onion Sets20	.90
Potato Onion Sets20	1.25
Top Onion Sets20	1.00

For larger quantities prices will be given on application.

ONION SETS.

PARSLEY.

Parsley requires rich, mellow soil; sow thickly in drills, one foot apart and half an inch deep. As the seed germinates slowly, it is best to soak it for a few hours in tepid water before sowing. For winter use, protect in a glass frame or light cellar.

One ounce to 150 feet of drill.

	Per Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
Extra Double Curled05	.10	.25	.75
Fern Leaved05	.10	.25	.75

PARSNIP.

Sow as early in the spring as the weather will admit, in drills fifteen inches apart, covering half an inch deep. When well up, thin out to five or six inches apart in the rows. Unlike carrots, they are improved by frosts, and it is usual to take up in the fall a certain quantity for winter use, leaving the rest in the ground until spring, to be dug as required.

One ounce for 200 feet of drill; five pounds to the acre.

	Per Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
Abbott's Improved or Long Smooth. Smooth and quite large; one of the best.....	.05	.10	.20	.50
Hollow Crown. Roots very long, growing mostly below the surface of the ground.....	.05	.10	.20	.50

PEAS.

Peas for an early crop, should be sown as soon as the ground is in working condition. The soil for their reception should be light, dry and well sheltered. Mild manure, such as leaf mould, has a beneficial effect; but for many of the varieties, the soil cannot be too rich. For general crops, the ground should be well manured the previous year, which causes them to yield more abundantly. When grown as a market crop, peas are never staked, and are sown in single rows, two or three inches deep, and from two to three feet apart, according to the variety or strength of the soil. When grown in small quantities for private use, they are generally sown in double rows, six or eight inches apart, and the tall varieties staked up by brush.

One quart to 75 feet of drill; two to three bushels to the acre.

Peas ordered by mail are subject to an extra charge of fifteen cents per quart for postage. Pints furnished at quart rates.

Extra Early.

	Per Qt.	Pk.	Bu.
Cleveland's Alaska. The earliest pea known, being very uniform in growth and almost entirely free from sports or runners. 90 per cent. of the pods can be gathered at the first picking. The dark green color of the pods makes it extremely desirable, as it can be carried long distances without losing color, which quality, combined with its earliness and uniformity of ripening, makes it the most desirable extra early for market gardeners ever offered. Height 2½ ft.20	.90	\$3.00

Cleveland's Rural New Yorker. Very early; prolific, uniform in ripening. The pods are large, and contain from six to nine peas. Height 2½ ft.20	.90	3.00
---	-----	-----	------

Carter's First Crop. One of the earliest varieties; 2½ ft.20	.90	3.00
--	-----	-----	------

Improved Daniel O'Rourke. A favorite early variety; and a good bearer; 3 ft.20	.90	3.00
--	-----	-----	------

Philadelphia Extra Early. Very desirable early variety; 3 ft.20	.90	3.00
---	-----	-----	------

Laxton's Alpha. One of the earliest wrinkled peas; of fine quality and very prolific; pods large and well filled; 2½ ft.20	1.00	3.25
--	-----	------	------

	Pkt.	Pint.	Qt.
Cleveland's Eclipse. This pea is claimed by the introducer to be the earliest variety yet grown, being a vigorous grower and a large producer. Pods of good size and true American Wonder in shape. Seed green and wrinkled, and of sweet and delicious flavor. Owing to earliness, productiveness, size of seed, quality and height of vine, this is destined to be the coming Pea for family use.10	.20	.35

	Per Qt.	Pk.	Bu.
McLean's Little Gem. A dwarf green wrinkled marrow of superior flavor; 1 ft.20	\$1.00	\$3.25

Carter's Premium Gem. A very fine dwarf, wrinkled pea, an improvement on Little Gem; 1 ft.20	1.00	3.25
--	-----	------	------

Nott's Excelsior. Robust and vigorous in growth, inclined to throw out laterals from the base of the stock, producing in profusion long handsome pods, closely packed with large peas of fine flavor. An improvement on American Wonder, being more vigorous and prolific, with larger pods with more peas than either the "Wonder" or "Premium Gem." A decided acquisition. Height 12 inches.20	1.00	3.75
--	-----	------	------

Bliss' American Wonder. One of the earliest wrinkled sort; grows about 9 inches high, and is covered with well-filled pods, often containing 7 or 8 tender and sweet peas. We offer none but the true stock.20	1.00	3.50
--	-----	------	------

PEAS—Continued.

Second Early Varieties.

	Qt.	Pk.	Bu.
Heroine. A medium early, green, wrinkled variety, pods remarkably long and handsome, slightly curved, well filled with large peas of fine flavor; 2 ft.20	\$1.00	\$3.25
McLean's Advancer. An early, green, wrinkled variety, of delicious flavor; 2 ft.20	.90	3.00
Horsford's Market Garden. An excellent, wrinkled variety, particularly suited for the market garden on account of its great productiveness as well as good quality; 2 ft.20	.90	3 00
Bliss' Abundance. Of dwarf, bushy habit; pods large, full and numerous, should be sown thinly; 1½ ft.20	.90	3.00
Duke of Albany. Resembling Telephone in appearance. Vine more dwarf, while the pods are larger and produced in greater abundance, which combined, make it a most desirable acquisition. Height 2½ to 3 ft.20	1.25	4.00

For General Crop.

Champion of England. One of the best and most popular Peas in cultivation; 5 ft.15	.75	2 75
Yorkshire Hero. A green, wrinkled variety of branching habit and fine flavor; 2½ ft.20	.90	3.00
Improved Stratagem. A sort in which the good qualities which gave the old Stratagem its popularity, are so developed as to make this a distinct variety. The pods are of immense size, very uniformly filled with very large dark green peas of the finest quality; vine medium height, but very stocky, with very broad, light green leaves, and bearing an abundance of large, handsome pods; <i>one of the very best varieties for market gardeners</i> ; 2 ft.20	1.25	4.00
Carter's Telephone. A wrinkled variety of superior quality. The foliage is luxuriant and of a light green color, bearing in great abundance large handsome pods from 5 to 7 inches in length; 3 ft.20	1.00	3.50
Bliss' Everbearing. Fine wrinkled marrow; pods three to four inches long, well filled with large peas; 2 ft.20	.90	3.00
Royal Dwarf White Marrowfat. One of the best late sorts; white seeded; very productive; 3 ft.15	.60	2.00
Black-Eyed Marrowfat. This as well as the preceding is extensively grown as a field Pea, hardy and productive; 4 ft.15	.60	2.00
Melting Sugar. Superior to all others of the edible pod sorts.25	1.50	5.00

PEPPER.

Grown largely for pickles. Sow in hot-beds early in April, and transplant to the open ground when the weather is warm and settled. The rows should be two feet apart and the plants fifteen inches apart in the rows. Rich, warm, mellow soil.

One ounce of seed will produce about 2,000 plants.

	Per Pkt.	Oz.	¼ lb.
Large Bell. Large and of mild flavor.05	.25	.75
Sweet Mountain or Mammoth. Similar to the Bell, but larger.05	.25	.75
Large Squash. Productive; much used for pickles.05	.20	.60
Red Cherry. Small, round, smooth, glossy, scarlet fruit.05	.25	.75
Long Red Cayenne. Bright red; very productive.05	.25	.75

POTATOES.

	Per Pk.	Bu.	Bbl.
X X Early. (New.) This is the earliest potato grown; will bear heavy manuring with Commercial Fertilizer, is a good yielder, free from rot or disease of any kind; is not excelled by any potato for table use; resembles the Rose in color. It is the coming potato for market gardening. Produced in 1896 as high as 300 bushels per acre. This can be put into the market earlier than any other potato grown. Grown in Aroostook County.....	.50	\$1.75	\$4.50
Early Oxford. This potato resembles the Early Rose in shape, it is of a lighter rose color, growing uniform and smooth in shape, eyes not sunken; quality unequalled.....	.40	1.50	4.00
Early Norther. This variety resembles the Rose in color, but is rounder in shape, not growing so long and flat. It is fully as early, and is hardy and free from disease. Grown in Aroostook County.....	.50	1.75	4.50
Beauty of Hebron. Very productive and early, slightly flesh colored skin with pure white flesh. Grown in Aroostook County.....	.50	1.65	4.25
New Queen. Resembles the Hebron in color and form, a vigorous grower producing large crops of large potatoes. Grown in Aroostook County.....	.50	1.75	4.50
Early Rose. The pioneer of all the improved varieties, and still highly esteemed, Grown in Aroostook County.....	.50	1.65	4.25

Rural New Yorker No. 2. Large and smooth variety of excellent quality; pure white skin and flesh; immense yielder, and intermediate in ripening. Grown in Aroostook County.....	.50	1.65	4.25

☞ Owing to a shortage in the crop of Potatoes, these prices are subject to change.

PUMPKIN.

Chiefly used for agricultural purposes. Same cultivation as for Cucumbers and Melons.

If sent by mail in quantities of one-half pound and upwards, add eight cents per pound for postage.

	Per Pkt.	Oz.	Lb.
Large Cheese. Medium size, best for cooking.....	.05	.10	.50
Sugar. Fine grained, sweet and prolific.....	.05	.10	.50
Connecticut Field. Large; best for stock.....		.05	.20

RADISH.

FRENCH BREAKFAST
RADISH.

Radishes thrive best in a light, rich, sandy loam; heavy or clayey soils not only delay their maturity, but produce crops much inferior, both in appearance and flavor. For a successive supply, sow from the middle of April until September, at intervals of two or three weeks. For an early supply they may be sown in a hot-bed in February.

One ounce for 100 feet of drill.

	Per Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
Long Scarlet Short Top. Very long and crisp; for frames or open ground.	.05	.10	.20	.50
Early Scarlet Turnip. Round, scarlet, small, short top, mild and crisp....	.05	.10	.20	.50
French Breakfast. A variety of quick growth; very mild and tender; one of the best for forcing.....	.05	.10	.20	.50
Brightest Scarlet. A new French variety.....	.05	.10	.20	.50
Black Spanish. One of the hardiest and best for winter use.....	.05	.10	.20	.50

SALSIFY.

Commonly called Vegetable Oyster. Used stewed, boiled or fried. When cooked has an oyster flavor. Sow early in drills fifteen inches apart; cover the seeds with fine soil, an inch and a half deep.

One ounce to 50 feet.

	Per Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
Long White French.05	.10	.30	\$1.00

SPINACH.

Sow early in spring, in drills a foot apart, every two weeks for a succession; and as it grows thin out for use. For fall use, sow in August, and for winter crop in September. Cover that which is left out over winter with straw or leaves, after the weather becomes quite cold.

One ounce to 100 feet of drill; ten to twelve pounds per acre.

	Per Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
New Thick-Leaved. Has very large and thick leaves.....	.05	.10	.15	.35
Savoy-Leaved. A very desirable variety; leaves wrinkled.05	.10	.15	.35
Long Standing. Dark green; the longest standing before going to seed....	.05	.10	.15	.35
Fall or Prickly. One of the hardiest and most generally used for fall planting.	.05	.10	.15	.35

SQUASH.

Any good, rich soil is adapted to the growth of the Squash. They only thrive well in a warm temperature, as all the varieties are tender annuals; and the seed should not be sown in spring until all danger from frost is past, and the ground is warm and thoroughly settled. The hills for bush varieties should be about six feet apart, for running sorts, ten feet. Leave two plants to a hill, and keep covered in the early stages with plaster.

SUMMER CROOK-NECK SQUASH.

Bush varieties, one ounce to 50 hills; running varieties, one ounce to 15 hills; four pounds per acre.

	Per Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
Yellow Bush Scalloped. An early market variety excellent for shipping..	.05	.10	.20	.60
Summer Crook-Neck. Early, productive, and of good quality; fruit orange yellow.....	.05	.10	.20	.60
Winter Crook-Neck. An old and well-known variety; hardy and a good keeper.....	.05	.10	.20	.60
Boston Marrow. A much esteemed variety; a good keeper, and of excellent flavor.....	.05	.10	.20	.60
Early Prolific Marrow. For fall and winter use this is a very desirable sort. It is of excellent quality and keeps well. Color brilliant orange-red.....	.05	.10	.20	.60

HUBBARD SQUASH.

SQUASH.—Continued.

Hubbard. A general favorite and more largely grown as a late sort than any other; flesh fine grained, dry and excellent flavor.....	.05	.10	.20	.60
Marblehead. A good winter squash resembling the Hubbard.....	.05	.10	.20	.60
Turban. Orange-yellow flesh of good flavor.....	.05	.10	.20	.60
Essex Hybrid. A valuable fall and winter squash. Very prolific, fine grain orange-red flesh very sweet and dry.....	.05	.10	.20	.60

Faxon. Medium size; very early and productive; orange flesh of fine quality.	.05	.10	.25	.75
Mammoth. Grows to a large size, often weighing over two hundred pounds; excellent for stock.....	.05	.20	.50	1.00

TOMATO.

This vegetable is one of the most important of all garden products. They thrive best in a warm, light rich soil. For early plants, sow about the first week in March in a hot bed, or in boxes or pots in a warm window. When the plants are about two inches high, set out in boxes, three inches deep, four inches apart, in the same temperature, or pot singly. If again transplanted before setting out, the plants will be still more stocky. Set out in the open ground about the first of June, four feet apart each way, using a shovelful of rotted manure in each hill. Keep well sheltered and watered until they are established, after which let the fruit have plenty of sun.

One ounce for 1,500 plants.

	Per Pkt.	Oz.	$\frac{1}{4}$ lb.	Lb.
Fordhook. Extra early; perfectly smooth and solid; medium size.....	.05	.25	.75	\$2.50
Livingstone's Beauty. Color very glossy crimson, grows in clusters of four or five; fruit large and solid.....	.05	.20	.60	2.00
Livingstone's Favorite. Productive; good flavor; few seeds; flesh solid; smooth and handsome.....	.05	.20	.60	2.00
Livingstone's Perfection. Early, large, smooth and solid; blood red color.	.05	.20	.60	2.00
Table Queen. A large, solid, smooth variety; color rich crimson and of a most agreeable acid flavor.....	.05	.25	.75	2.50
Dwarf Champion. An early variety; fruit medium size, resembling the Acme in color.....	.05	.25	.60	2.00
Royal Red. A fine variety for the main crop; color bright red.....	.05	.25	.75	2.50
Stone. A large variety of a bright scarlet color, ripening evenly to the stem; a good keeper and not subject to rot.....	.05	.25	.75	2.50
Red Cross. Early, very smooth and even in size throughout the season, perfectly solid, in color a brilliant crimson, ripens clear to the stem.....	.05	.30	.85	3.00
Essex Hybrid. Very early, solid, rich flavored, large size and very productive.....	.05	.20	.60	2.00
Acme. Medium, red; smooth and good quality.....	.05	.20	.60	2.00
Paragon. A round, solid variety; bright, glossy red; smooth and large.....	.05	.20	.60	2.00
Trophy. Very large, solid and of fair quality.....	.05	.20	.60	2.00
Canada Victor. Red; very early; of fine quality.....	.05	.20	.60	2.00
Red Cherry. A small early variety, size and shape of a cherry; for pickling.	.05	.30	.85	3.00
Yellow Cherry. Same as above except in color.....	.05	.30	.85	3.00

TOBACCO SEED.

	Per Pkt.	Oz.	$\frac{1}{4}$ lb.
Connecticut Seed Leaf.05	.30	\$1.00

PURPLE TOP MILAN TURNIP.

TURNIP.

Turnips thrive best in rich, sandy, gravelly soil. The earliest varieties can be sown as soon as the ground can be worked, either in drills or broadcast. For a succession, sow at intervals of a fortnight until the last week in July, from which time until the end of August sowings may be made for the fall and main crops.

One ounce for 150 feet of drill; one to two pounds in drills for an acre.

To keep the roots fresh during the winter, they may be placed in a cool, dry cellar and buried with dry sand.

Per Pkt. Oz. $\frac{1}{4}$ lb. Lb.

Purple Top Milan. The earliest variety in cultivation. Flesh white, hard, and of excellent quality.....	.05	.10	.25	.75
White Egg. Oval; handsome and sweet.....	.05	.10	.15	.50

Purple-Top Strap Leaf. Best variety for main crop, equally good for spring or fall sowings; white flesh.....	.05	.08	.15	.40
---	-----	-----	-----	-----

White-Top Strap Leaf. Similar to the above in quality...	.05	.08	.15	.40
---	-----	-----	-----	-----

Yellow Stone. Fine hard winter sort.....	.05	.08	.15	.50
---	-----	-----	-----	-----

Early White Six Weeks. Pure white, very early.....	.05	.08	.15	.50
---	-----	-----	-----	-----

Golden Ball. A rapid grower, of excellent flavor; bright yellow, a good keeper, a superior table variety.....	.05	.10	.15	.50
--	-----	-----	-----	-----

Yellow Aberdeen. An excellent hardy variety, keeping well through the winter.....	.05	.10	.15	.50
--	-----	-----	-----	-----

RUTA BAGA or SWEDE TURNIP.

Per Pkt. Oz. $\frac{1}{4}$ lb. Lb.

Carter's Imperial Hardy Swede. This variety is an improvement upon the other varieties, being larger, the flesh firmer, and an excellent keeper.....	.05	.08	.15	.40
---	-----	-----	-----	-----

Skirving's Purple Top. A standard variety, hardy and productive.....	.05	.08	.15	.40
---	-----	-----	-----	-----

Sweet German. White, sweet and a good keeper.....	.05	.10	.15	.50
--	-----	-----	-----	-----

Sweet and Medicinal Herbs.

No garden is complete without a few herbs for culinary or medicinal purposes, and care should be taken to harvest them properly. This should be done on a dry day, just before they come into full bloom, then dried quickly and packed, entirely excluded from the air. Sow in spring, in shallow drills, one foot apart and when well up thin out or transplant to a proper distance apart.

KIMBALL'S PLANT COMPOUND.

For Stimulating Growth and Rapidly Developing the Plant Organism.

This compound is composed of all the constituents requisite for perfecting the growth of all Flowering Plants. For Parlor Plants, the Wardian Case, Conservatory, or Greenhouse it will be found indispensable.

Two sizes, 10 cents and 25 cents.

These Fertilizers have for 37 years led the world as crop producers, because of their high agricultural value, and superior mechanical condition.

The best farmers everywhere use them with unvarying success and increasing confidence every season.

We freely recommend the "Bradley," brands to all of our patrons, recognizing that in every grade fertilizer "Bradley's" productions will invariably give the greatest satisfaction upon all varieties of crops, and under every condition of soil.

Be sure and send to us for their Catalogue, before purchasing any fertilizing materials, and learn our prices for their absolutely superior goods.

We would call especial attention to the following brands, which easily take first place wherever used :

BRADLEY'S SUPERPHOSPHATE.

A high grade fertilizer of superlative value, for general use, either with or without stable manure.

BRADLEY'S POTATO MANURE.

The best potato grower known. It is used by leading farmers everywhere, and always produces large crops of smooth, sound potatoes.

BRADLEY'S COMPLETE MANURES

for potatoes and vegetables, for top-dressing grass and grain, for corn and grain, with 10% potash, for all crops are beyond question the richest and most concentrated fertilizers made, and are especially adapted for intensive farming.

BRADLEY'S SEEDING DOWN MANURE

is used by the best hay farmers, with marked success. It furnishes just the dressing needed for seeding down, and will repay its cost by the first season's hay crop, and greatly increase the fertility of the soil for years.

We carry a full stock of these goods constantly on hand, and can fill all orders promptly and at very low prices.

SHEEP MANURE.

This is a pure natural manure and the most nutritious food for plants. Its effect is immediate and lasting, it is clean to handle, and is the best of all manures for mixing with the soil for greenhouse plants. As a lawn top-dressing it is unequaled. For mixing with soil, take one part manure to six parts soil. For making a liquid, take one pound manure to five gallons of water, which can be used with safety daily if necessary.

Price.—5 lb. package, 25 cts. 10 lb. package, 40 cts. 100 lb. bag, \$2.00.

PURE GROUND BONE.

4 to 5 per cent. ammonia; 21 to 23 per cent. phosphoric acid.

AMERICAN HORSE AND CATTLE OIL.

For Protection of Horses and Cattle from annoyance of Flies and Insects of all kinds.

Also Invaluable for Scratches, Cuts and Bruises.

Contains the best and most effective ingredients known for the protection of horses and cattle from the terrible pest of flies and insects.

Per Pint, 25c.; per Quart, 40c.; per 1-2 Gallon, 75c.; per Gallon, \$1.00.

Distributes any dry powder.
Thousands in use.

LEGGETT'S PARIS GREEN OR DRY POWDER GUN.

The distribution of the powder can be so easily regulated that a half pound or a pound of Pure Paris Green or London Purple may be evenly distributed over an acre of Potatoes. By leaving only a slight opening in the slots at the bottom of the reservoir, the faintest smoke of powder can be forced from the gun.

Hellebore, Insect Powder, Slug Shot, Flower of Sulphur or Lime can be distributed better and more economically than in any other way.

Price, \$7.50 Each.

ACME ATOMIZER.

The Acme Atomizer

For spraying Paris Green and Other Insecticides on Potato Vines, Shrubs, Small Trees, House Plants, Live Stock and Poultry.

A Great Labor Saver on the Farm and in every Garden, Barn, Greenhouse, Orchard and Hennyery.

It will apply the Finest Possible Spray on any object desired and exterminate any kind of insect life.

Weighs only one pound; Can holds one and one-half pints and will cover 750 hills of potatoes, and *Kill the Old Bugs*.

Well and simply made of heavy tin, combined into the strongest possible shape, it cannot come apart, and easily cleans itself when turned upside down.

Was thoroughly tested last season and gave universal satisfaction.

Indispensable on every Farm. Price 75 cents.

Acme Powder Gun.

A Simple Practical Implement for the Extermination of Potato Bugs and all kinds of Insects, Flies, etc., the Pests of every House and Garden.

It will handle all insecticides in their dry state—Pure Paris Green, Hellebore, Persian Insect Powder, etc. It is very effective in the destruction of Potato Bugs, Currant Worms and all like pests, and for the wholesale destruction of house flies, using freshly ground Persian Insect Powder, cannot be excelled.

This Powder Gun is well made, with a solid hardwood head block, hardwood handles, best leather for the bellows, (an extra elbow is furnished to tilt the funnel for getting under the leaves of plants and shrubs,) and is well finished throughout, making a neat, attractive and serviceable implement.

Price, \$1.00 Each.

ACME POWDER GUN.

Eureka Fumigators.

No. 332. Myers' Fountain Knapsack Spray Pump with one tube, rubber bulb and rose. Price \$3.00.

SYRACUSE SPRING TOOTH HARROW.

Frame, Tooth bearing Bars and Teeth are Steel. The frame runs on Steel Shoes which can be renewed at small expense. All Castings Malleable. Superior Work. Most convenient for clearing and turning about or transporting from place to place.

This style of Harrow has advantages over the ordinary float Harrow, in that the depth of work can be quickly changed even while the Harrow is in motion, and by operating the levers a uniform depth can be maintained in soils of variable hardness.

15 Tooth, Two Horse, with plain teeth.....Price \$14.00
17 " Two or Three Horse, with plain teeth.....Price 15.00

"BUFFALO PITTS" All-Steel, Spring-Flexible, DISK HARROW.

With Solid or Spade Cutting Blades.

The only Disk Harrow in the World having independent adjustable spring pressure upon the inner end of each gang of disks, allowing any amount of pressure to be thrown upon the inner ends of the gangs by the foot of the operator. Price, 16 in. \$20.00; Price, 20 in. \$25.00. Including Neck Yoke, Whiffletrees and Evener.

"BUFFALO PITTS" All-Steel, Spring-Flexible, DISK HARROW.

WITH SPADING OR SHEAR CUTTING BLADES.

Especially adapted for stony land, or hard and lumpy soil, the only Disk Harrow that will pass over an obstruction and leave equal pressure upon opposite disks with no weight upon the horse's necks while working.

PRICE:—16 inch Disk, \$20.00.

Including Neck Yoke, Whiffletrees and Evener.

The Yankee Pulverizer.

Combining late improvements in Disk Harrows.

Price \$24.00. Extra for Scraper Attachment \$2.00. Extra for Neck Yoke, Whiffletree, and Evener, \$2.00.

SYRACUSE SPIKE TOOTH HARROW.

Adapted to pulverize and level the soil and to cultivate young crops. The teeth can be instantly changed from the perpendicular to the horizontal position, thereby throwing the Harrow on the runners for transportation. The teeth are adjustable for wear and the Tooth Holders will hold equally well teeth one-half or five-eighths of an inch square.

STYLE B—Five Bars, 30 teeth per section. Weight 220 lbs. Price \$11.00.

CLIPPER SMOOTHING HARROW.

The teeth being convertible merely by change of hitch from perpendicular to slanting, it combines all the principles of two harrows in one. The superiority of having teeth in a slanting position is beyond doubt or question, as they cut and pulverize the soil thoroughly without clogging, leaving the trash under the soil.

It is also excellent for cultivating corn, potatoes and other crops when small.

Price, Two Sections Reversible, 48 Round Steel Teeth, \$10.00.

Price, Three Sections Reversible, 72 Round Steel Teeth, \$14.00.

National Reversible Sulky Plow.

The only successful Sulky Plow made that will plow stony, rough Side Hill or Level Land.

ONLY NEEDS TO BE TESTED TO BE APPRECIATED.

THOUSANDS IN USE.

Of Light Draft and Easily Handled.

Coulters, with Clamps.....	\$1.30 Each
Coulters, without Clamps.....	1.00 "

SYRACUSE STEEL FRAME CULTIVATORS.

In this series of Cultivators the side and cross bars are made in one piece, forming a long and stiff frame, which makes a very steady running cultivator and one not likely to clog.

The Syracuse Cultivators are made almost wholly of steel. They are not only light and easily handled, but are strong and indestructible, and have many especially good qualities not found in the ordinary implement. All the points, excepting the shovel point are reversible, thus giving double wear. The wing points can be easily changed to throw more or less earth to or from the crop, as may be required, and the pitch of all the points can be altered by simply removing one bolt in each standard. Wheel standards are malleable or wrought iron. Clevises are malleable iron. The handles can be raised or lowered or shifted to the right or left.

No. 121—Expanding Lever, five 3-inch Points and Stationary Wheel, Price \$3.50.

No. 123—Expanding Lever, five 3-inch Points, Wing Points, Shovel Point and Stationary Wheel, Price \$4.00.

This style of Cultivator is particularly well adapted to use where instant variation while the Cultivator is in motion is desired in either width or depth of the work being done. Especially valuable for close or irregular work and soils of variable hardness. The facility with which the wheel may be lowered and raised when turning about at the edge of the field is also found to be quite a convenience.

No. 31—Expanding Lever, five 3-inch Points, and Stationary Wheel, \$5.00

No. 138—Expanding Lever, five 3-inch Points, Wing Points, Shovel Point and Lever Wheel, 5.50

No. 101—Expanding Lever, five Points, Hiller Sweepes and Wheel, \$6.00

This Cultivator is made with an extra long and heavy frame.

SYRACUSE SPRING TOOTH CULTIVATOR.

Ten Tooth, One Horse, plain teeth, with lever. Weight, 120 lbs.
Price, \$10.00.

Syracuse Spike Tooth Cultivator.

Especially adapted to pulverize the soil and leave it smooth and level. The Teeth are reversible and the pitch can be quickly changed forward or back by simply loosening one bolt at each tooth.

Expanding Lever, fourteen Spike Teeth and Wheel. Price \$4.00.

"Planet Jr." No. 8, Horse Shoe and Cultivator.

We call special attention to the important points in the construction of this machine.

The Zephaniah Breed Weeders.

Without any doubt the "Zephaniah Breed Weeders" are the finest tools in their class, on the market. They will work all kinds of soils, and all crops grown in New England at a saving of from two-thirds to nine-tenths the time usually required, and their timely use greatly increases the crops.

Weeders have come to stay, and within a very few years every farmer will have a Weeder just as surely as he has to-day *any* kind of a cultivating tool. We advise all our farmer friends to carefully investigate the subject of purchasing Weeders, and we confidently recommend the above make as one of the best. Descriptive Catalogue mailed on application.

THE "JEWEL" DOUBLE WHEEL HOE, CULTIVATOR AND PLOW COMBINED.

The "Jewel" is capable of being quickly adjusted in depth or width of working, or height of handles. As shown in cut, it is provided with four slender stirring teeth, each one made of one piece of steel, unexcelled for thorough work, especially on hard soil; one pair of side shoes, particularly intended for use among small plants; also a pair of ploughs for throwing to or from the row, or for opening furrows. The standards of these hoes and plows are of malleable and wrought iron—no cast iron. **Price Complete, \$5.00.**

THE "GEM" SINGLE WHEEL HOE, CULTIVATOR AND PLOW.

Price Complete, \$3.75.

THE "NEW MODEL" SEED DRILL.

The Most Perfect Drill in America.

In reference to the "New Model" Drill we do not think it necessary to enter into a discussion about the necessity for and economy in the use of Seed Drills. Farmers and Gardeners generally, we believe, are now well enough posted to understand and fully appreciate all these points. Suffice to say that the "New Model" is the result of careful experimenting in the field and factory, in close comparison with leading drills, and being constructed with the view of avoiding all radical defects of said drills, built in a workmanlike manner, of best material and in neat style and finish, we venture to assert it will be found to be the *best seed drill in use* and indeed a *model* in every respect. **Price, \$6.50.**

The "Iron Age" Double Wheel Hoe.

With Cultivator Teeth, Plows and Rakes.

Points of improvement in the Iron Age Wheel Hoe are very light steel wheels, 16 inches in height; high arch, capable of working 20-inch plants; tubular frame coupled to malleable castings, giving extreme lightness with freedom from breakage; wheels quickly adjusted in height without entirely removing the axle nuts; they not only can be placed inside the frame for working in narrow spaces, but an extra axle is sent out with each tool to be used as shown in Fig. 76, making a perfect Single Wheel Hoe. We emphasize this point strongly, as a single wheel is certainly preferable in all garden work with the single exception of working astride the row. The vine lifters are adjustable in height, and without entirely removing the confining nut.

The tool is fully equipped with side hoes and plows, finely shaped and polished, while the slender steel cultivator teeth are particularly adapted for thorough and deep cultivation, even in very hard soil. A pair of rakes is also included, which do admirable work in various ways, particularly in destroying young weeds and fining the soil preparatory to seed sowing.

We wish to strongly emphasize the really extraordinary ease with which the "Iron Age" Wheel Hoe is operated, the lightness and construction of the tool being such that every ounce of effort goes direct to the work accomplished.

Price \$6.00.

Fig. 76.

Showing the Double Wheel Hoe
set up as a Single Wheel.

The "Iron Age" Combined Seed Drill and Wheel Hoe.

With Cultivator Teeth, Plows and Rakes.

The Seed drill attachment is complete in itself, and when put in place requires but two bolts to secure it; the single wheel is then put in position, the chain run on, and the drill is ready for operation. The seed slide and its index adjustment to sow the various seeds is similar to that used on the well known New Model Seed Drill, while the agitator is simply a revolving brush, of selected bristles, which will not injure the seed, wear a long time and can be cheaply replaced.

The opening plow is adjustable in depth and also reversible, one end being wide for onion seed, and the other narrow for placing the seed in a close, straight line. In place of a covering roller, we use a small, steel smoother—doing the work of a roller with none of its weight and clumsiness. This, together with the coverer, to which it is attached, is adjustable to suit various soils and depths of covering.

It plows, levels, furrows, sows, covers, rakes, cultivates, hoes and hills, and does each and every operation in the most satisfactory manner.

Price complete, \$9.00.

"PLANET JR." No. 4 Hill Dropping Seed Drill, Hoe, Cultivator, RAKE AND PLOW.

It combines conveniently in a single garden implement, a hill dropping and a continuous row seeder, with the most perfect and complete single wheel hoe, cultivator, rake and plow that the most practical can desire.

Price Complete, \$10.00.

THE PLANET JR.

Combined Hill Dropping and Fertilizer Drill.

To meet the pressing demand for a drill which will sow seed and fertilizers, both at the same time, this combined machine is made. In addition to planting all garden seeds in rows and in hills, four, six, eight, twelve, or twenty-four inches apart, it also sows the fertilizer at the same operation, and with the same regularity and economy. The seed hopper holds two quarts and the fertilizer hopper four quarts. Price, \$16.00.

The Racine Broadcast Seeder.

It will sow perfectly any quantity to the acre of all kinds of grain, Oats, Barley, Rye, Buckwheat, etc., or Grass Seeds, Clover, Millet, Timothy, Hungarian, etc. It will also sow Peas, Corn and Fertilizers; in fact, anything which requires broadcasting in a most satisfactory manner. It is the latest Wagon End Seeder on the market. Send for Descriptive Catalogue.

Price, \$10.00.

Pierce's Improved Cahoun's Patent BROADCAST SEED SOWER.

For Sowing Wheat, Oats, Barley, Rye, Buckwheat, Grass Seed, &c.

This hand machine sows from Four to Eight Acres per Hour, at a common walking gait.

A saving of four-fifths of the labor, and one-third of the seed used in hand sowing is effected by using this machine. A person entirely unused to sowing by hand can use it with perfect success. Warranted to give perfect satisfaction.

Price, \$3.00.

THE IMPROVED Robbins' Potato Planter.

This Planter is one of the most thoroughly constructed machines offered to the farming public; it is carefully made of the very best materials and consequently is strong, durable and thoroughly practical.

“ “ “ with Fertilizer Attach- ment.....	70.00

SEND FOR SPECIAL CIRCULAR.

THE KING OF THE CORN FIELD CORN PLANTER AND FERTILIZER DISTRIBUTOR.

PLANTS CORN, BEANS, PEAS, BEETS, AND OTHER SEED OF LIKE SIZE.

This planter is perfectly adapted to every requirement; durable and simple in construction; not liable to get out of order, in consequence of its having no gears, chains, or other complicated parts to break or wear out.

This machine is arranged to drop any desired quantity of seed or fertilizer at a time, at equal and various distances apart, in hills or drills of uniform depth. *The seed dropping device is positive, never misses or skips a hill.*

Price, \$25.00. Descriptive Catalogue mailed on application.

KEMP MANURE SPREADER.

The Kemp Manure Spreader will evenly and thoroughly spread all kinds of manure found upon the farm, from the roughest and toughest down to the finest, including ashes in all conditions, wet or dry, and the time required to spread a load is from one and a half to two minutes without manual labor.

It can be regulated to spread different quantities of manure to the acre.

Price, complete with forward wheels, \$110.00. Without forward wheels, \$90.00.

ADVANCE FERTILIZER DRILL.

The increased use of commercial fertilizers has fairly compelled the farmer and planter of the present day to provide himself with improved appliances for properly and economically distributing these adjuncts of modern farming.

We claim the "Advance" to be the best low-priced distributor on the market, and would call attention to its distributing disc, of galvanized iron, which can neither break nor rust; also to the wrought iron wheel, light and strong.

A first-class tool for the drilling of peas and corn.

Price, \$7.00.

The Worcester Buckeye is Made in Six Sizes.

- Standard Buckeye Mower, 3 ft. 6 in. (1 horse)

- New Chain Gear Mower, 4 ft. (1 horse.)
- New Chain Gear Mower, 4 ft. 6 in.
- New Chain Gear Mower, 5 ft.
- New Chain Gear Mower, 6 ft.

Send for Descriptive Catalogue and Price List.

Extra Value Exclusively In the Worcester Buckeye Mower which Costs you Nothing.

Scythes never break.

Self Oiling Pitman (no oiling, no hot box).
Chafe Plates (take up the wear—maintain the shear-cut).

Foot Lift (lifts the bar higher than any other).

Carrying springs (carries the weight of the cutter bar on the wheels—no dragging by the horses).

Quality (no accident or delay).

Lightness of draft.

More than enough saved in first year than the difference between the price of the best and the poorest—the Worcester Buckeye Mower is substantially as good a machine after ten years of work as it was when new—the maker of a poor mower can afford to sell his mower at less than cost—he makes his money out of the repairs. The farmer in the end pays him a big profit.

The Six Foot Chain Gear Worcester Buckeye Mower.

THE LIGHTEST OF LIGHT DRAFT MACHINES.

THE YANKEE HORSE RAKE.

Some of the Leading Points of Superior Excellence found in the Yankee Horse Rake are:

Simplicity in construction and excellent quality of materials.

Adaptability to rake anywhere, whether the fields are rough or smooth, or the hay green or dry.

Rake-head adjusted so as to *balance the weight* of the teeth.

This device (peculiar to the Yankee Rake) prevents the teeth from falling back heavily to the ground, after dumping the winrow. It also completely prevents the teeth from dragging heavily, and digging up old rubbish or filling the hay with dirt and dust.

Teeth run level with the grounds at their points.

The Yankee has more teeth (which are placed nearest together) than most other rakes.

Teeth always made from the best crucible cast steel, tempered in oil.

A tooth can be inserted or removed in less than five seconds, and without disturbing any bolts.

Each tooth is perfectly independent in action and supplied with a yielding spring that will allow it to pass safely over any obstruction that the axle can pass over, saving at least three-fourths of the expense of broken teeth caused by pressure bars and guides used on rakes that CANNOT USE THIS PATENTED DEVICE.

PRICE, \$20.00.

The New England Champion Horse Rake.

Warranted to Give Perfect Satisfaction in Every Respect.

High Wheels, Bent Shafts, the Strongest and Most Easily Operated Dumping Device.

An Improved Oscillating Stripper Head, which can be readily raised when backing the horse; large and strong braces which make the rake run steadily; and *Sled Runner* or sword pointed teeth are among the valuable features of this rake.

PRICE, \$17.00.

BULLARD'S IMPROVED HAY TEDDER.

THE BULLARD IMPROVED HAY TEDDER having been submitted to the severest test of field work, is admitted to be the only one yet offered to the public that will thoroughly spread long, heavy grass, taking it up from the bottom, tossing it gently into the air, and leaving it light upon the ground for free access of sun and air.

By its features of construction *its forks extend outside and in the rear of the wheels*, thus the wheels are always inside and in front of the forks and no hay that has been teded is run over and matted down, *as is the case with all other hay tedders* where the wheels are outside the forks.

PRICE, \$32.00

THE NEW MODEL MUDGETT TEDDER.

Thoroughly Made and Adjusted in all its parts.

The draft is light, owing to high wheels and direct application of power to the work, no intermediate gears being used.

Price, One-Horse Tedder,	- - - - -	\$27.00
Price, Two-Horse Tedder,	- - - - -	28.00

The Haymaker Steel Track Hay Carrier.

In offering the HAYMAKER Steel Track Carrier to our friends, we do so knowing it to be a thoroughly FIRST-CLASS machine in every respect. It is made of the best annealed malleable iron, is strong, and being SIMPLE, must be DURABLE. The Carrier is what is known as a Combination machine or a SWIVEL and REVERSIBLE both in one. It is constructed with straight-flanged wheels BORED ON LATHE so as to run true, which revolve on a $\frac{3}{4}$ inch turned steel axle.

HANGING HOOK is malleable iron; can be put on or taken off at any point along the track. THE TRACK is a solid steel I beam 2 1-16 in. wide x 1 1-4 in. deep, with no holes, all pieces being exact duplicates. The splice is made by means of a malleable iron clamp held in place by four bolts, can be applied to any two pieces of the rail, and make a splice as strong as any other part of the rail.

THE LOCK.—The lock is composed of two malleable pieces with no SPRINGS, and a positive Force Lock, cannot get out of order. STOP is clamped to TOP OF TRACK, is and can be adjusted to any point desired. All rope wheels revolve on large bushings.

Horse Pitch Forks.

Single and Double Harpoon
and Palmer Forks,

Also Hooks, Pulleys and Rope.

The Stoddard Churn.

THE MOST PERFECT CHURN MADE.

The Stoddard Churn is made by hand in the most thorough manner, and of kiln-dried white oak. It will last for years. The principle is concussion and not friction—has no floats or paddles inside. It is easily operated, easily cleaned.

Easiest Churn to get Cream into—Easiest Churn to get butter out of—Easiest Churn to keep Clean—Because the entire top can be removed.

It is simple in its construction, and has no parts liable to get out of order. The Churn being air-tight, the cream is not affected by the temperature of the room while churning.

It fully meets the requirements of large or small dairies and is offered at a price within the reach of all.

It is especially adapted to the GRANULAR SYSTEM of making butter. The grain of the butter is perfectly preserved, which adds to its keeping qualities.

5½	Forty-five Gallon Churn, churns from 5 to 20 gals. cream	12.75
6	Sixty Gal. Churn, churns from 6 to 28 gals. cream	15.00

There is less liability of getting Churns too large than too small. Be sure and order Churns large enough. There must be room in the Churn to produce concussion, and a small Churn filled too full will require a longer time for churning.

The Blanchard Churn.

The following are the leading merits of the BLANCHARD CHURN:

Perfect quality of all materials used. Excellency of manufacture. Simplicity of construction, having no cog wheels or gearing. Durability. Ease of operation. The action of the dasher is such as to cause agitation of the cream by creating currents, and not by beating or by friction of the cream, which may injure the grain of the butter. Facility in removing the dasher and getting at the butter. Ease of cleaning, the form of construction making the inside without any inaccessible or invisible angles or corners.

COMBINATION BUTTER PRINT.

The extensive sale and universal satisfaction given by the use of the COMBINATION BUTTER PRINTS for the past few years, have earned a reputation second to no other print in use.

The cut here shown represents No. 6 print in its Mould, which holds two lbs., and is divided into eight cakes, $\frac{1}{4}$ lb. each. The Butter is pressed into the Mould on to the face of the Print with a paddle, which is also used as a stick to strike off surplus butter. In filling, the Mould stands upon the butter-worker or table, and the butter pressed into the Mould with the left hand on top of paddle.

No. of Print.	No. of Cakes.	Capacity of Moulds in lbs.	Capacity of each cake in ounces.	Dimensions of Moulds in inches.	Dimensions of each cake.	Price.
1	3	$1\frac{1}{2}$	8	10 x $3\frac{1}{2}$	$3\frac{1}{2}$ x $3\frac{1}{3}$	\$3.50

BUTTER CARRIERS.

These Carriers are made of White Wood, are very strong, and will stand handling by Express Companies. The trays are so arranged that the butter is not marred in the least in handling. The ice box is made of zinc, and has two compartments: the top for ice and the bottom for the water as the ice melts; so the ice is melted by air alone, thereby lasting much longer than if the ice rested in the water. This arrangement has received the highest praise from those who have used it.

PRICE LIST.

<i>Without Ice Box.</i>	<i>With Ice Box.</i>	<i>No. Trays.</i>	<i>Size.</i>	<i>Price.</i>

The Haney Jacket Refrigerator Transportation Can

This Transportation Can is now the best constructed, *strongest* and most popular cream or milk Carrier *ever* offered to the public. A trial will convince any one that this is the can for gathering or transporting milk or cream. This carrier is now being used by a majority of the leading creamery men throughout the entire country, and their universal verdict is: "Your Jacketed Cream Carrier is the best thing of the kind we ever had, and has given entire satisfaction:—they will pay for themselves the first year." If you are in need of goods, *buy the best—they are always the cheapest.*

Prices, 20 Gallons, \$6.50; 30 Gallons, \$7.50.

THE Waters Butter Worker

Practical, Efficient, Durable. It combines more advantages than any other. The Tray is removable and thus takes the place of the butter bowl.

Will work butter in any condition satisfactorily. Made in sizes to suit any dairy or factory.

THE DE LAVAL CREAM SEPARATORS.

The De Laval "Baby" or Dairy Cream Separators are now made in six different sizes and styles. These are "Baby" No. 0 or "Humming-Bird," Old Style "Baby" No. 1, New Style "Baby" No. 1, "Baby" No. 2, "Baby" No. 3, and Dairy Turbine. They range in capacity from 150 lbs. to 700 lbs. of milk per hour. By capacity is meant the separating capacity of whole milk per hour. Any amount of milk from a gallon upward may be separated with either of the machines, it being simply a question of duration of run, according to quantity.

DUMAS IMPROVED BUTTER BOX WITH PARCHMENT LINING.

If you have not, you should send for a trial lot and get prices. You will be surprised at the quality of the box for the price, and therefore use no other. It is the greatest invention of the age.

The following is a brief description: The box holds five pounds of packed butter, it is nearly brick shape, flaring so the butter will turn out and is in the best possible shape to cut up for the table in squares like prints, and free from waste. The box is also lined with parchment paper to keep the butter free from the wood taste that is so objectional to all other small packages. These boxes are put up in 60 lb. crates, also make special size crates to order. Send for prices.

PRAY'S PATENT ICE PLOW.

This plow is especially designed to meet the demand for a cheap and efficient ice cutter for farmers and dairymen. It will cut from 20 to 40 tons an hour, cutting the ice blocks of uniform size, which saves much labor when packing.

The Superiority of Pray's Ice Plow.

1st. It is the only plow that has a seat. The extra weight of the rider holds the plow to its work and allows the horse to be hitched much closer to the plow. An advantage where the pond is small and all the ice needed from the edge of the pond.

2nd. It is the only plow that can be successfully used by one person. The draft back of runners omits the necessity of leader or rider.

3d. It is the only plow that has an adjustable tooth.

4th. It is the only plow that works with runners.

5th. It turns easier at the end of the row than any other plow.

6th. It cuts ice with more economy on a small pond than any other plow.

Upon a shallow pond where a saw cannot be used this plow is indispensable. A horse and one man can cut as much ice as ten men with saws.

WARRANTED TO WORK AS REPRESENTED.

Price, Four-Tooth Plow, - \$14.50

Price, Six-Tooth Plow, - \$20.00

Price, Eight-Tooth Plow, - \$24.00

She can't call them away from it.

The unprecedented success of "BRADLEY'S SUPERIOR MEAT MEAL" for stimulating large egg yield, and quickly growing fine fleshed Broilers, has caused it to become very popular wherever introduced.

It is composed of Beef, Blood, and Bone, so combined in easily digestible form, that it furnishes the best possible food for growing Chickens and laying Hens.

A regular feeding of "Bradley's Superior Meat Meal" only costs 1½ cents a hen a month, and its free use makes poultry keeping very profitable.

PRICES:—100 lb. bags, \$2.00; 50 lb. bags, \$1.25.

Prolific Poultry Food.

Will Make Hens Lay in Fall or Winter.

PROFITABLE FEED AT ALL SEASONS OF
THE YEAR.

The secret of getting eggs lies in supplying the hen with proper material. This is just what Prolific Poultry Food will do. It supplies all the Egg, Shell and Flesh-forming material necessary, and it stimulates nature to convert this material into eggs. It is not expensive as one pound will last a dozen hens a month, and repay many times its cost.

The Improved Challenge Incubator.

This machine will meet the requirements of all who raise chicks, ducks, or turkeys,—hatching all equally well; and, unlike other machines, does not require an expert or genius to run it. Any man or woman can run one with perfect success, as it is perfectly self-regulating, with no complicated machinery to get out of order and perplex the operator.

The tank of water in the top of the machine radiates a perfect and uniform heat in all parts of the egg chamber, and the regulator being operated from the same source, it will readily be understood that the temperature must always be the same.

No. 3. Cuts 8 to 10 lbs. in 3 to 4 minutes,	.	.	Price, \$9.00

"Iron Clad" Steel Bushel Basket.

These baskets are made of cold rolled steel drawn from one piece and furnished with malleable Iron handles. Aside from the general usages of baskets, the "Iron Clad" will be found by farmers especially, a very useful vessel for the purpose of boiling liquids or cooking food for stock.

PRICE—1 Bush. Galvanized, \$1.50.

White Mountain Ice Cream Freezers.

The manufacturers have perfected the White Mountain Freezer by the introduction of the new and important feature of a *double self-adjusting wood scraping bar* attached to the duplex dasher that has always been used exclusively in this freezer. By means of this device the actual time of freezing cream has been very materially reduced and with the White Mountain Freezer as at present constructed, cream of the finest quality can be frozen in *only four minutes*, or less than one-half the time required with any other freezer on the market.

An Illustrated Catalogue of Fly-Wheel Freezers, tubs and cans for packing purposes, repairs, etc., furnished free upon application.

Improved "Arctic" Freezer.

Features of especial merit:

A strong, Waterproof tub, bound with heavy, galvanized iron hoops; a detachable hinge top frame, with all gearing completely covered, so that nothing can get between the cogs; Cans of best quality of charcoal tin plate, and a *tinned beater with double self-adjusting wood scraping bar*.

The Can of this freezer may be revolved after the beater is removed, which is an advantage in freezing fruit.

The Arctic is positively the best freezer in the market of its cost, and second only to the White Mountain.

SWEET AND MEDICINAL HERBS.

No garden is complete without a few herbs for culinary or medicinal purposes, and care should be taken to harvest them properly. This should be done on a dry day, just before they come into full bloom, then dried quickly and packed, entirely excluded from the air. Sow in spring, in shallow drills, one foot apart and when well up thin out or transplant to a proper distance apart.
